

IT as a Service

Empower modern health care

Health plans face a number of operational and market challenges, from driving down costs and maximizing revenue models, to managing risks of new member populations and supporting more customer-centric offerings.

To thrive in this rapidly changing technological, regulatory and consumer-driven environment, health plan CIOs strive to more strategically support the business. They are challenged to:

- Adapt to evolving Infrastructure technologies.
- Modernize, develop and transform health applications.
- Prepare for big data and enable data-led insights.
- Continuously adapt cybersecurity to protect critical health information.
- Integrate systems and create operational efficiencies.

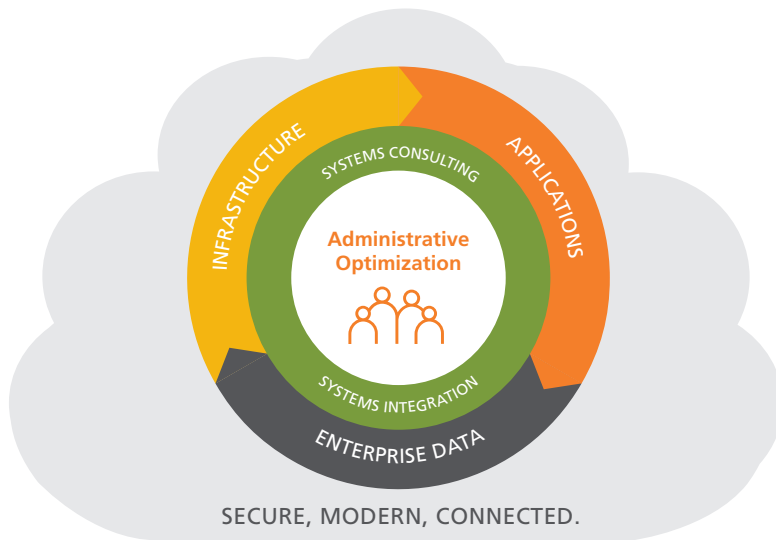

Optum® IT as a Service (ITaaS) provides a secure, modern, integrated IT platform to support operational efficiencies, growth, new business models and innovation.

Our health care-grounded approach provides the connective fabric to integrate the health care ecosystem for better health and business outcomes. Plus, our “as a service” model scales up or down to match your business growth and helps reduce capital and recurring investments on technology platforms and applications.

Optum ITaaS helps:

- Enable a nimble IT infrastructure.
 - Provide health IT talent aligned to evolving technology.
 - Obtain a higher level of security.
 - Increase efficiencies.
 - Lower per member per month (PMPM) administrative costs.
-

Value-driven transformation and simplified, secure operations.

Systems consulting and integration

Seamlessly integrate and optimize enterprise applications and data as well as external trading partners.

Enterprise Data Platform

Uncover actionable insights and drive innovation from increasingly voluminous, complex data across the health ecosystem.

Application development and management

Modernize your legacy application portfolio with modular, “as a service” business applications inherently designed to integrate with cloud infrastructure and analytic platforms.

Infrastructure services

Lay a secure, reliable and efficient foundation for “as a service” capabilities that offer greater scale, flexibility and agility.

Security

Protect critical health care information across your enterprise in a digital world through advanced information and network security.

Only a health care-grounded approach solves health care problems.

Optum provides the technology, data and experience to face the challenges of modern, connected health plans. Our end-to-end, health care-focused expertise includes over 1,000 multi-disciplinary experts, 700 security experts, 49,000+ health IT and business process experts with deep knowledge and capabilities across all lines of business. We bring over 30 years of experience integrating solutions to transform how health care works. Optum is your strategic partner providing health care advisory expertise from planning to initiation through operational execution and onward for long-term success.

Modernize your health IT to better support evolving business needs.
